FOR IMMEDIATE RELEASE

BOSS Announces WL-30XLR Wireless System

Plug-and-Play Wireless Mic System with Hassle-Free Set Up, Rock-Solid Connectivity, and Long Runtime via Convenient AA Battery Power

Los Angeles, CA, January 18, 2021 — BOSS, a world-leading innovator in effect pedals, amps, and other guitar-related products and a brand trusted by top musicians for decades, is now providing wireless freedom for microphone users with the new [WL-30XLR Wireless System](#). An affordable, high-quality wireless system for XLR dynamic microphones, the WL-30XLR offers hassle-free set up, robust performance, and long runtime with common AA batteries. From singers, speakers, and beatboxers to DJs, MCs, video producers, and beyond, the WL-30XLR makes it easy for everyone to embrace premium wireless microphone sound.

The WL-30XLR system consists of a streamlined transmitter that connects to nearly any standard XLR dynamic mic, and a compact receiver that plugs into an XLR mic input on a mixer, stage amp, or other audio destination. Lightning-fast processing provides exceptional sound with ultra-low latency, plus strong line-of-sight transmission up to 230 feet/70 meters.

The WL-30XLR's receiver and transmitter each use a single AA alkaline battery, which provides up to 11 hours runtime to cover multiple gigs and rehearsals.

Wireless set up with the WL-30XLR is simple. First, the user presses a button on the receiver to automatically scan 14 channels and find the best one for their environment. Next, they confirm the setting on the transmitter, and they're ready to go.

Availability & Pricing

The BOSS WL-30XLR Wireless System is available now for \$299.99.
