FOR IMMEDIATE RELEASE

BOSS Introduces WL-60 Wireless System

Advanced BOSS Wireless Performance with Easy Visual Setup

Los Angeles, CA, June 13, 2019 — BOSS introduces the [WL-60 Wireless System](#), the newest member of the growing WL family of wireless products for musicians. The pedalboard-friendly WL-60 is a perfect fit for serious stage performers, combining great tone and ultra-low latency performance with easy visual set up. The system's receiver features a large display and automatic 14-channel scanning that makes operation quick and efficient, while the rugged bodypack receiver offers best-in-class runtime and compatibility with nearly any electric instrument.

With the WL-60, the set up process is virtually effortless, eliminating the complicated procedures required with other systems. The comparative strength of all 14 channels is shown after scanning, providing a complete overview of the current wireless conditions. This makes it simple to choose the optimum channel for any stage situation, and also provides fast set up when multiple band members are using WL-60 systems.

The included [WL-60T Transmitter](#) mounts securely on a belt or instrument strap. Thanks to BOSS's efficient power technology, users can enjoy extra-long runtime of up to 25 hours with two alkaline AA batteries. A short standard cable (included) provides the instrument connection, allowing the WL-60T to work with nearly any guitar or bass. The WL-60T is also available separately for backup and outfitting multiple stage instruments.

The WL-60's receiver is the same size as a BOSS compact pedal, making it ideally suited for pedalboards. In addition to simplifying set up, the large LCD provides visual feedback on channel selection, wireless strength, and more. Two cable tone simulation options are available, and a standard input jack is provided for connecting with a traditional guitar cable when needed. The receiver is powered via a PSA-series adaptor or AA batteries. With adaptor power, the receiver's DC output can distribute power to one or more pedals.

The BOSS WL-60 and WL-60T will be available for \$279.99 and \$129.99 (U.S. Street) respectively at authorized BOSS retailers in the U.S. To learn more, visit www.boss.info.
