

## Press Release

## BOSS Announces GX-1 and GX-1B Multi-Effects Processors and FSC-10 Footswitch Cap

*Powerful, Ultra-Compact Guitar and Bass Processors and High-Quality Footswitch Caps for a Wide Range of BOSS Products*

**Anaheim, CA, January 15, 2026** — BOSS announces the [GX-1](#) and [GX-1B](#), two entry-level additions to the popular GX multi-effects series. The GX-1 is designed for guitarists, while the GX-1B is tailored for bassists. BOSS also expands its accessories lineup with the [FSC-10](#) Footswitch Cap, a high-quality solution that makes standard metal footswitches easier to press while performing.

### **GX-1 and GX-1B**

The GX-1 and GX-1B deliver pro-grade sound in ultra-portable platforms for practice, recording, and performance. Authentic GX series amp and effect algorithms supply endless creative fuel, while high-res color displays, intuitive effect buttons, and Gear Suite tools make sound creation a snap. Beyond the internal sounds and chassis colors, each product offers identical features.

The GX-1 and GX-1B make premium sound accessible to every player, from beginners and home enthusiasts to touring pros seeking an all-in-one travel solution. With a vast selection of amps and effects, adjustable effect order, and eight simultaneous blocks plus a volume pedal and noise suppressor, users can easily craft custom setups for playing different music styles and performing specific songs on stage.

Whether editing presets or building sounds from scratch, the GX-1 and GX-1B are designed for frustration-free creation. Hexagon-shaped panel buttons provide a visual representation of the effect categories, and it's possible to turn effects on/off with a tap or access detailed parameters with a long press. There are 99 memories loaded with ready-to-play presets, plus 99 user memories for storing custom sound creations.

The GX-1 and GX-1B introduce Gear Suite, a powerful new feature that enables quick setup of amps and effects. Each type includes professionally tuned Gear Suite settings, and players can save favorites in user locations for instant access to personalized parameters.

The GX-1 and GX-1B each offer freely assignable footswitches and an expression pedal that support control of everything from basic effects on/off to multiple parameter targets. Going further, wired and wireless options are available for external control. Each unit offers three versatile power options (batteries, AC adaptor, or USB), allowing users to practice and perform anywhere.

In addition to their sounds and performance features, the GX-1 and GX-1B include Bluetooth® and USB connectivity to elevate practice and recording sessions. The BOSS Tone Studio app further enhances the user experience with YouTube integration, built-in rhythms, editing features, and pro sounds on BOSS Tone Exchange.

### **FSC-10 Footswitch Cap**

Footswitch caps are an affordable way to enhance the functionality of traditional pedal switches, making them more visible on stage and easier to press. Molded from rugged, transparent polycarbonate that allows LEDs to shine through, the FSC-10 is a high-quality solution that works with a growing range of BOSS gear.

The FSC-10 is fully compatible with BOSS products that have metal footswitches, including multi-effects such as the GX-1 and GX-1B, select pedal effects, and Loop Stations. Each FSC-10 package includes 10 units.

### **Availability & Pricing**

The GX-1 and GX-1B are available now for \$229.99. The FSC-10 is also available now for \$14.99.
