BOSS Announces TU-02 Clip-On Tuner

Trusted BOSS Tuning Performance for Guitar, Bass, Ukulele, and Other Stringed Instruments

Los Angeles, California, January 18, 2021 — BOSS announces the [TU-02](#) Clip-On Tuner, the latest addition to the company's industry-leading lineup of instrument tuners. BOSS's famous tuner range includes numerous solutions for all types of musicians and educators, from handheld and clip-on designs to the pedal-based TU-3 used by top touring professionals around the world. Designed for guitar, bass, ukulele, and other stringed instruments, the TU-02 delivers best-in-class performance and the latest BOSS tuning features.

With its bright, high-contrast color display, the TU-02 offers easy visibility for quick tuning in any environment. The rugged clip provides secure mounting on an instrument's headstock, and the display can be swiveled for optimum viewing.

Users can choose from standard tuning modes for guitar, 4- and 5-string bass, and ukulele, or chromatic mode for alternate tunings and other stringed instruments. Flat tuning over a range of two semitones down is supported, perfect for players who like to tune low for a heavier sound. A

single CR2032 lithium battery provides continuous runtime up to 24 hours, and the tuner automatically powers off when idle to conserve battery life.

Availability & Pricing

In February 2021, the TU-02 Clip-On Tuner will be available for \$12.99.

For the full press kit, including hi-res images, specs, and more, click [here](#).
