FOR IMMEDIATE RELEASE

BOSS Introduces Waza Craft TB-2W Tone Bender Pedal

BOSS and Sola Sound Unite to Reimagine the Iconic Sola Sound Tone Bender MK II Fuzz from the 1960s

Los Angeles, California, December 1, 2020 — BOSS announces the [Waza Craft TB-2W Tone Bender](#), a new pedal developed in collaboration with Sola Sound, the maker of the legendary Tone Bender fuzz pedals first introduced in the 1960s. Housed in the classic BOSS compact chassis, the TB-2W is an authentic sonic recreation of the Tone Bender MK II pedal heard on some of the most influential guitar tracks produced over the last five-plus decades.

Among the iconic fuzz pedals in music history, the Tone Bender is one of the most revered and unique. Embraced by some of the greatest guitarists of all time, the pedal's bold, rich voice and smooth sustain are forever embedded in the annals of rock and pop music history. Sola Sound produced numerous variations through the years, and many consider the late-'60s "MK II" version to be the ultimate Tone Bender voice.

Using a "masterpiece" Tone Bender MK II (serial number 500) from Sola Sound's archive as a benchmark reference, BOSS engineers have fully realized the pedal's magical sound and expressive dynamic response through meticulous analysis and detailed Waza craftsmanship. Available in a limited production run, each TB-2W features rare germanium transistors carefully tested for optimum tone, a three-way voltage selector, selectable true/buffered bypass operation, and a refined circuit design for ultra-consistent performance from pedal to pedal.

Availability

The TB-2W Tone Bender will be available in Q2 2021.
